

West End Beach Trail Project Underway

September 3, 2014

Sections of Grandview Parkway will experience periodic closures while the Michigan Department of Transportation and Elmer's construct the West End Beach Trail and Access Project. The scope of the work includes the extension of a non-motorized trail along the north side of West Grandview Parkway from the parking lot at West End Beach to Elmwood Avenue; a pedestrian crossing of the parkway; a small

viewing platform and ramped access to the beach; and a stormwater treatment structure.

Residents should be aware the parking lot at West End Beach is closed and users are encouraged to use Bay Street as an alternative. Also, the existing dirt pathway along the north edge of Grandview Parkway will not be passable throughout the project but the paved trail on the south side will remain open. Construction is slated to be complete by October 30.
