

Milestones

■ **Team Elmer's** produced its one millionth cubic yard of concrete at its Traverse City facility as part of the state bridge reconstruction on M-22 over Glen Lake. The plant along U.S. 31 south of Traverse City started production in 1990 and the first yard was poured at the Dennonos Museum Center at Northwestern Michigan College. John Meddaugh has served as quality assurance officer throughout the plant's operation. The company currently operates 13 concrete plants around northern Michigan.
